

Carbon Border Adjustment Mechanism (CBAM) regulation

The Carbon Border Adjustment Mechanism (CBAM) regulation introduces a tariff on carbon intensive products, such as steel, cement, and some electricity imported to the European Union.

After a thorough review, we have determined that the CBAM regulation does not apply to most of our products, as it only applies to goods we sell with the following tariff codes:

- 7318: Screws, bolts, nuts, coach screws, screw hooks, rivets, cotters, cotter pins, washers (including spring washers) and similar articles, of iron or steel.
- 7607: Aluminum foil (whether or not printed or backed with paper, paperboard, plastics or similar backing materials) of a thickness (excluding any backing) not exceeding 0.2mm.
- 7616: Other articles of aluminum.

These are the only products potentially impacted: as specified in Annex I and Annex II of the CBAM regulation, if the value of these goods does not exceed EUR 150 per consignment, the CBAM regulation does not apply.

For any further questions or detailed clarifications, please do not hesitate to reach out to our Compliance team at compliance@edmundoptics.co.uk.
